Roof & Gutter De-icing System

RoofMate – Roof & Gutter De-icing system is designed especially for residential houses to prevent the formation of snow and ice dams on roofs, within gutters and drainage pipes. The system regulates power output depending on the ambient temperature and therefore decreases the consumption of energy.

100% quality control

Adapts to most roof and gutter

Can be overlapped in straight or spiral

Certified advanced technology

Advantages

- Prevents damage from snow and ice dams
- Keeps water in gutters and drainage pipes flowing
- Ready-to-install
- Automatically adjusts to ambient temperature
- Highly durable and reliable
- Energy-saving
