

Thermostat HC10TPM

HC10TPM is a manual thermostat with digital display of the temperature on the screen. The thermostat is simple to operate the main switch and the temperature setting is directly on the front.

The temperature is controlled with a floor sensor which is a part of the delivery. The temperature setting is done using the arrow keys on the front - up or down. The built-in 2-pole circuit breaker provides optimal security and are therefore often used in bathrooms.
